

# Jume Brice

FRONTEND DEVELOPER | TEAM LEAD

---

<https://github.com/Jumeb> | <https://jumeb.github.io/> | <https://www.linkedin.com/in/jume-njah/>

## PROFESSIONAL SUMMARY

Accomplished front-end developer with a proven track record of building highly responsive, high-performing platforms prioritizing user experience and minimizing third-party dependencies. Adept at guiding talented teams in applying atomic design principles to deliver pixel-perfect, accurate implementations within tight timelines. Combines technical expertise, strategic vision, and effective leadership to drive successful project outcomes.

## AREA OF EXPERTISE

✓ NextJS	✓ ReactJS	✓ TypeScript	✓ CSS3
✓ GraphQL	✓ Tailwind CSS	✓ HTML5	✓ Redux JS
✓ Enzyme	✓ Jest	✓ React-native	✓ Team-work

## CAREER HIGHLIGHTS

**Codebase optimization:** Successfully minimized up to 60% of third-party dependencies for the GasVisor mobile application, resulting in a 30% enhancement in user experience.

**Efficient execution:** Demonstrated a history of achieving a 98% pixel-perfect implementation of UI designs from the UI/UX department, utilizing minimal third-party packages, and driving a 30% increase in the deployment of new features.

**Teamwork:** 4+ years in team environments including 1.5+ years leading frontend development teams, resulted in a 20% increase in new feature releases by streamlining highly responsive implementations.

## PROFESSIONAL EXPERIENCE

**Chief of Engineering**, Camsol Technologies UG, | AUG 2023 - Present

In this leadership role, I assisted in managing a 20 million euro portfolio consisting of two projects: one mobile and one web.

- Managed the implementation of the web platform's Calendar scheduler, resulting in a 10% increase in user growth and a 5% reduction in package dependency.
- Led the mobile team in implementing Redux for state management, resulting in a 50% code reduction and 40% efficiency increase.
- Guiding team in implementing design details from Figma for improved collaboration and development efficiency.

### **Lead Frontend developer**, Camsol Technologies UG, | DEC 2022 - AUG 2023

Led team growth initiatives and spearheaded a small project that scaled to a multimillion-dollar venture.

- Partnered with the Product Owner to restructure the GasVisor mobile app codebase, aligning it with atomic design principles and improving code navigation by 70%.
- Implemented GitHub actions for automated Android APK generation and managed iOS TestFlight builds, enhancing platform-specific styling in the codebase.
- Enhanced GitHub workflows with branching strategies, automated checks, and streamlined deployments, resulting in a 28% boost in team velocity.

### **Frontend Developer**, Camsol Technologies UG, | MARCH 2022 - DEC 2022

Joined as an entry-level position in a startup, learning the company's structure and seeking mentorship for career advancement in tech.

- Developed a mobile app for Romis using React Native, Contentful with GraphQL, and modern design patterns, enhancing their online purchase and financial record management.
- Adeptly troubleshooted known and unknown codebase issues, consistently delivering 5 integrated screens per week..
- Engaged in client discussions and strategic planning.
- Maintained this application and delivered on client request until the contract was over which led to me being recognized and given better opportunities.

### EDUCATION

**Bachelor in Engineering**, University of Buea, Faculty of Engineering and Technolgy | SEPT 2017 - AUG 2021

### TECHNICAL PROFICIENCIES

- **Proficient:** React, NextJS, CSS3, SASS, SCSS, TailwindCSS, React Native, JavaScript, TypeScript, Problem-Solving.
- **Familiar with:** NodeJS & Express, MongoDB, Directus, Heroku, Vercel, Docker
- **Tools:** VScode, Jira, Bitbucket, GitHub, Postman, MongoDB Compass, GitHub actions. Xcode.

### PROJECTS

**Flavours** Since AUG 2023 (Email: [tester@gmail.com](mailto:tester@gmail.com), Password: Qwerty1234)

A B2B/B2C platform connecting aspiring chefs in pastries or meals with food consumers.

- Implementing front-end solutions to simplify management and financial record-keeping for aspiring chefs.
- Developing REST APIs for CRUD operations requested by the front end, utilizing Express and MongoDB.
