PROFESSIONAL SUMMARY

Skilled Frontend Developer with over 4 years of experience specializing in building responsive, high-performing web applications using **React, Next.js, and TypeScript**. Adept at implementing **pixel-perfect UI/UX** designs and optimizing performance with server-side rendering. Experienced in developing **AI-powered products** (including LLM-based chatbot solutions) and collaborating with cross-functional teams in fast-paced, agile environments. Eager to contribute to innovative, cutting-edge AI solutions.

CORE COMPETENCIES   Team leadership | Decision Making | Excellent Communication | Time Management | Debugging & Troubleshooting | Agile Development | SEO optimization

TECHNICAL SKILLS   HTML5 | CSS3 | React | NextJS | JavaScript | TypeScript | TailwindCSS | Redux | Styled Components | GraphQL | RESTFul API | Enzyme & Jest | Docker | AWS | Redis | MongoDB | UI/UX design principles

PROFESSIONAL EXPERIENCE

PROJECT LEAD | DEVELOPER   Camsol Services GmbH | Remote | *August 2023 - Present*

- Developing an AI-powered chatbot interface using atomic design principles to deliver a responsive, **pixel-perfect UI** across all devices.
- Implementing server-side rendering and reusable components with NextJS, improving performance and scalability.
- Collaborating with backend teams to integrate **LLM, RAG models** using RESTful APIs while incorporating SEO best practices and accessibility standards

LEAD FRONTEND DEVELOPER   Camsol Technologies Ltd.| Remote | *December 2022 - August 2023*

- Enhanced GitHub workflows by implementing branching strategies, and automated checks, increasing team velocity by 28%.
- Coordinated QA sessions to ensure **pixel-perfect UI** implementation in alignment with Figma designs.
- Implemented GitHub actions for automated Android APK generation and managed iOS TestFlight builds, enhancing feature release and testing by 10%.
- Optimized dashboard performance for large datasets using React Virtualized, contributing to faster load times.

FULL-STACK DEVELOPER   Camsol Technologies Ltd. | Remote | *March 2022 - December 2022*

- Designed and maintained secure, scalable RESTful APIs using Node.js and Express.
- Developed robust MongoDV schemas, improving query performance and reducing latency
- Implemented robust authentication and authorization mechanisms using JWT/OAuth, enhancing API security.

FREELANCE WORK

[Flavours](#)   *August 2024 - Present*

- Applied **atomic design principles** and reusable component patterns with Next.js to improve maintainability.
- Developed mobile first brand dashboards for data visualization and reporting, integration caching strategies with Redis.
- Made components to WCAG compliant enhancing SEO optimization.

- Collaborated closely with front-end teams to define API contracts and streamline integration processes.

EDUCATION

UNIVERSITY OF BUEA   Faculty of Engineering and Technology

Bachelor's in Computer Engineering (Top 10% of class)

Relevant Coursework: Data Structures and Algorithms, Software Development, Databases, and Analysis and Algebra

LANGUAGE

- English (Native)
- French (Intermediate)
- German (Beginner)
